

## ***Innovative Engineering - designed for long life***

RM&C's capabilities extend to the sale, service and repair for a range of Positive Displacement Pumps and Yamada Air Operated Double Diaphragm Pumps.

Durability, performance and simplicity of design make the pumps the optimum choice for a wide range of industrial pumping operations.

Pumps in RM&C's product range offer the following features:

- Rugged industrial design
- Strong and robust
- Dry running with no damage
- Self-priming
- Excellent abrasive particle resistance
- Excellent slurry handling capabilities
- Variable flow rates and discharge pressures

## ***Pump Service Capabilities***

RM&C consider that having the capability to support the sale of Positive Displacement and Double Diaphragm pumps provides only part of today's end-user needs. Here at RM&C we also ensure that:

- Replacement parts/accessories are delivered to meet customer time schedules.
- Cost-effective pump repairs are carried out to pump manufacturers' exacting engineering standards.
- An assessment and full report of work to be carried out and all costs involved prior to repair are approved and agreed by the customer.
- Full pressure and performance tests are carried out prior to shipment following repair.

# Pumps Specifier

**"Fax us the figures - we'll help you"**

Pump type: Air operated/motor driven		Outlet pipe diameter (mm)	
Fluid flow (L/min)		Discharge line length	
Viscosity (CP)		Suction lift	
Specific gravity		Price target	
Vapour pressure		Quantity	
N.P.S.H.		Present supplier	
Temperature range		Delivery time	
Available air supply (psi)		Application details:	
Supply voltage (motor driven)			
Inlet pipe diameter (mm)
