

BREARLEY

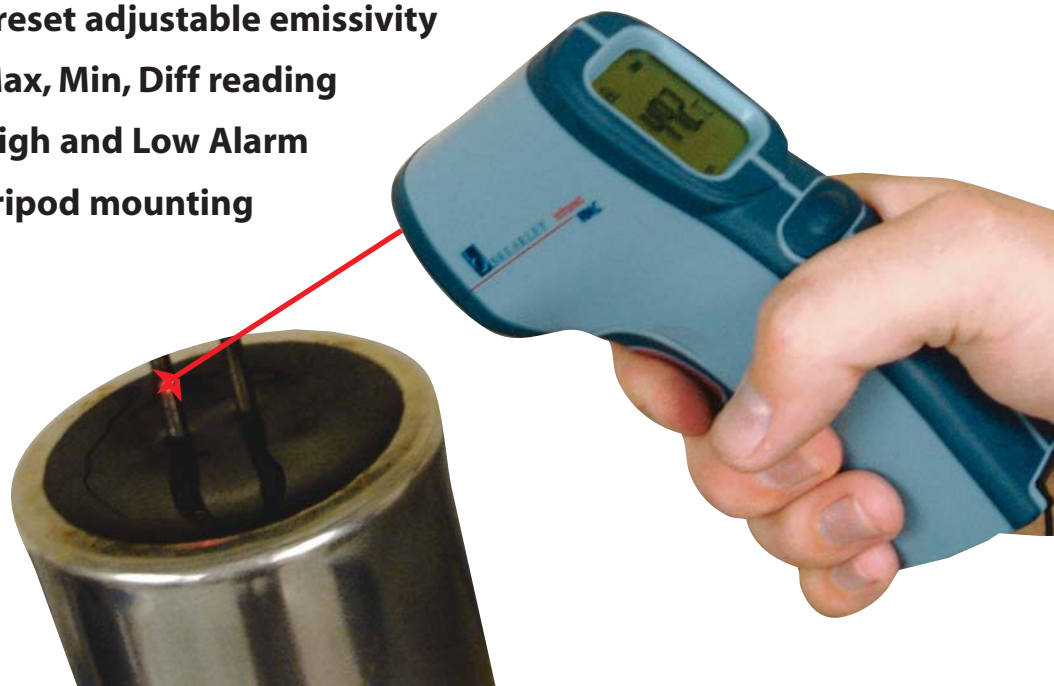

NEW

BREARLEY

Infrared

The new innovative compact low cost Infrared Thermometer, professional for industrial applications. For use at all engineering levels.

- -30–500°C Temperature Range
- Comfortable: Pistol Grip
- Easy to use (°C/F selectable):
- Just a “click” to measure
- Immediate response
- Ultra Sharp Laser sighting
- Large backlight LCD display
- Preset adjustable emissivity
- Max, Min, Diff reading
- High and Low Alarm
- Tripod mounting

Pressure

- World leader in ceramic strain gauge technology since 1988
- The only UK manufacturer of ceramic pressure sensors
- Low cost, ready to use pressure capsules to fully packaged pressure transducers
- Experienced Design Team will help integrate pressure capsules into your product

Temperature

- The UK's largest manufacturer of thermocouples and temperature probes
- Technical help desk for application solutions
- Standard and custom designs
- Fast track system for urgent deliveries and accessories

Flow

- Flow measurement solutions for 1,000s of applications
- Industry standard or custom designed products
- UK's leading manufacturer of VA Flowmeters
- Application specialist to help with product selection
- Flowbits Catalogue 2005

Systems

- Design, develop, install and commission process measurement panels
- Simple temperature monitoring panels to complex gas emission sampling installations
- Environmental monitoring specialists
- Approved contractor for nuclear facilities

Service

- UKAS accredited for 4 fields of expertise: Pressure - Temperature - Flow - Electrical
- Approved to ISO9001:2000 and ISO 17025
- Laboratory calibration and on-site service
- Workshop repairs
